

# How to access Campus Wi-Fi from Any Network.

## What is this?

This gives students studying in the university the opportunity to be connected to the Campus Wi-Fi network through any Mobile or Router connection.

**You can use this from anywhere in Sri Lanka.**

It is not necessary to have data in the connection.

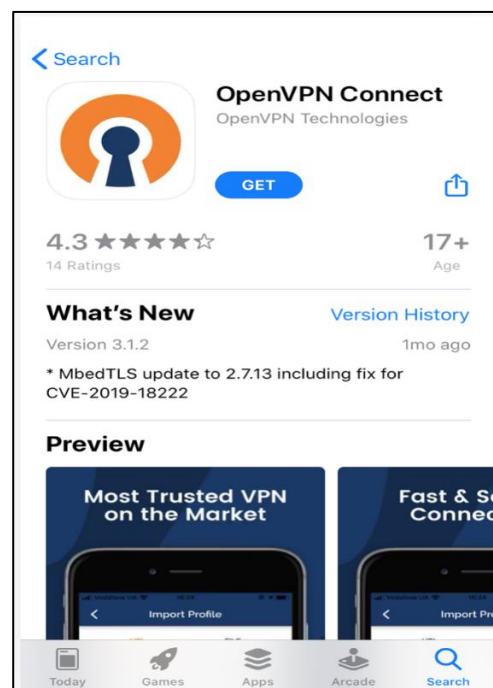

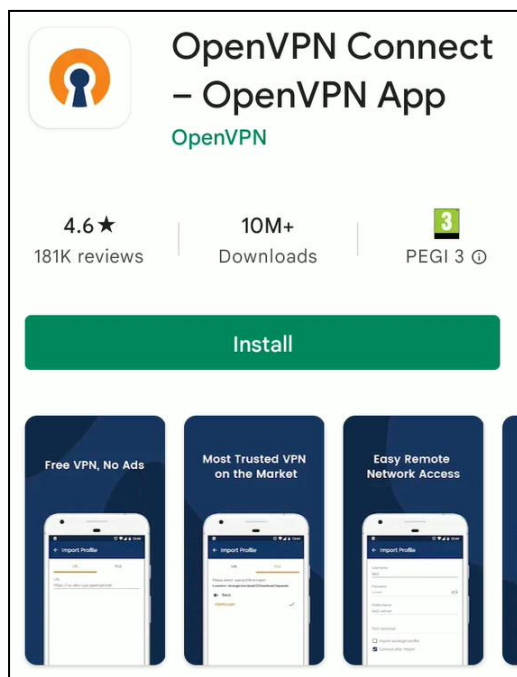

It is completely **Data Free**.

## Step 01

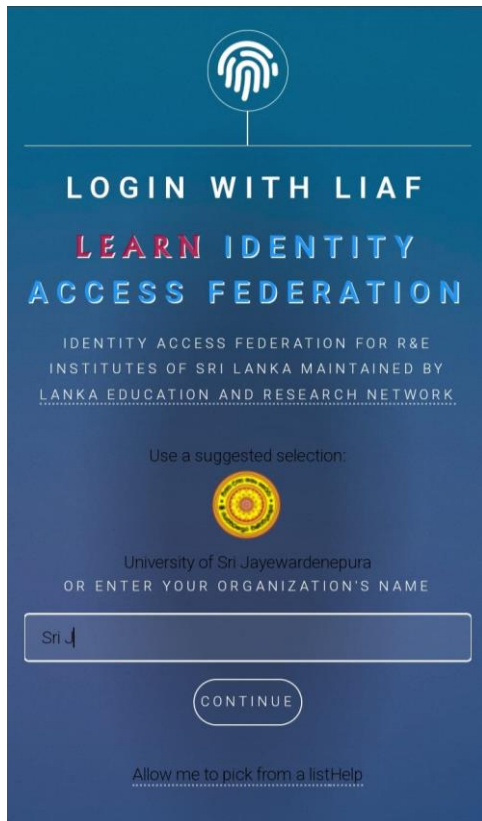

First, you need to DOWNLOAD the OpenVPN APP from Play Store or Appstore.

Android: <https://play.google.com/store/apps/details?id=net.openvpn.openvpn>

IOS: <https://apps.apple.com/us/app/openvpn-connect-openvpn-app/id590379981>

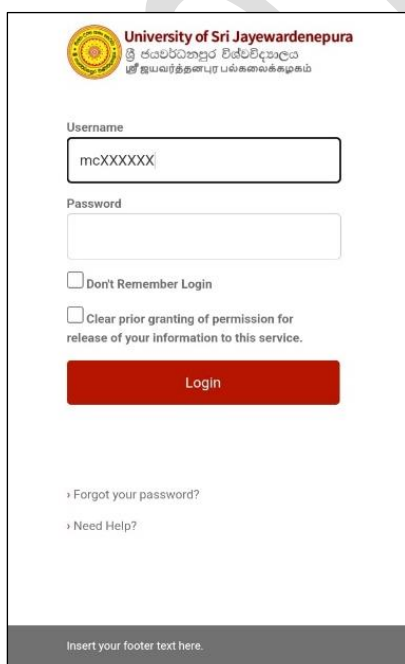

## Step 02

Then visit the website [eduvpn.ac.lk](http://eduvpn.ac.lk)

Here, type **Sri Jayewardenepura** in the search bar and continue.

## Step 03

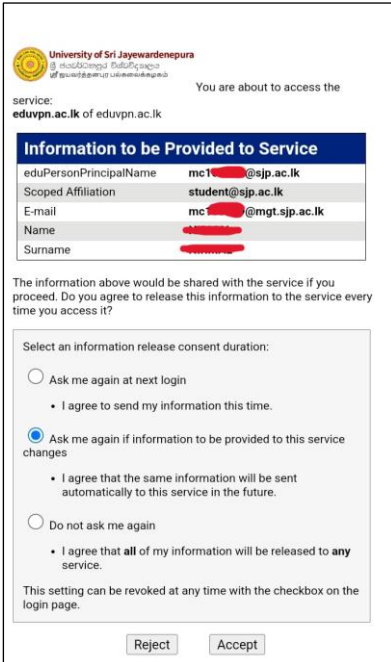

Then a login page will appear like this.

Then enter your username and password here.

Username is USJNET username. Password is USJNET password.

## Step 04

University of Sri Jayewardenepura  
මහවිජයාපාය විශ්වවිද්‍යාලය  
මහවිජයාපාය පාඨමහා විද්‍යාලය

You are about to access the service:  
**eduvpn.ac.lk** of **eduvpn.ac.lk**

Information to be Provided to Service	
eduPersonPrincipalName	mc1[redacted]@sjp.ac.lk
Scoped Affiliation	student@sjp.ac.lk
E-mail	mc1[redacted]@mgt.sjp.ac.lk
Name	[redacted]
Surname	[redacted]

The information above would be shared with the service if you proceed. Do you agree to release this information to the service every time you access it?

Select an information release consent duration:

☐ Ask me again at next login

- I agree to send my information this time.

☒ Ask me again if information to be provided to this service changes

- I agree that the same information will be sent automatically to this service in the future.

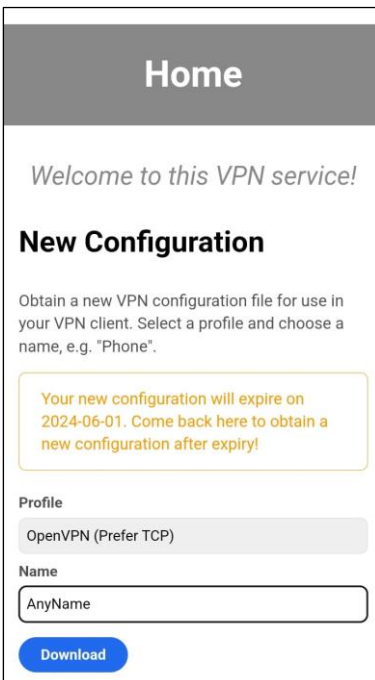

☐ Do not ask me again

- I agree that **all** of my information will be released to **any** service.

This setting can be revoked at any time with the checkbox on the login page.

Then come to this page and read its details and click accept.

## Step 05

Home

Welcome to this VPN service!

### New Configuration

Obtain a new VPN configuration file for use in your VPN client. Select a profile and choose a name, e.g. "Phone".

Your new configuration will expire on 2024-06-01. Come back here to obtain a new configuration after expiry!

Profile

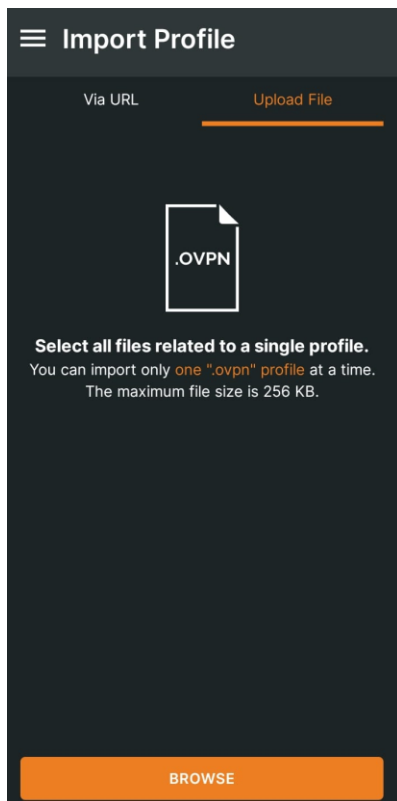

OpenVPN (Prefer TCP)

Name

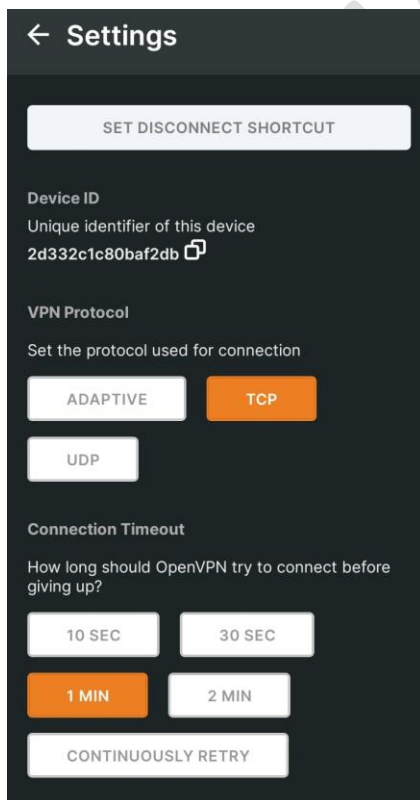

AnyName

Then this New Configuration page will come. Select the profile **OpenVPN (Prefer TCP)** and give a single word name of your choice under Name. Then click Download. There, the configuration file will be downloaded to your device.

## Step 6

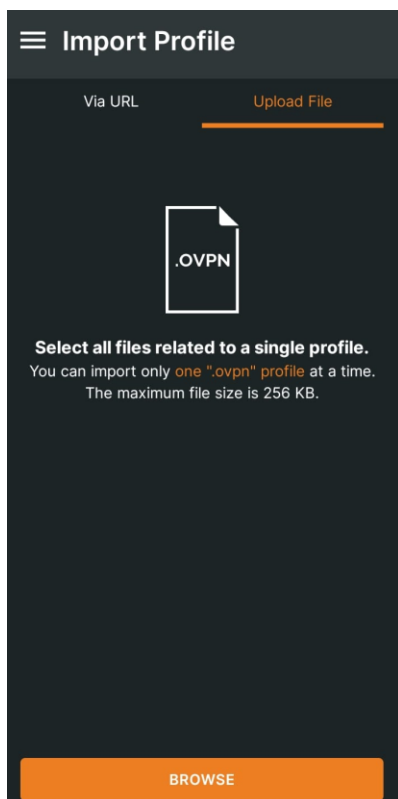

Then open the previously installed OpenVPN App.

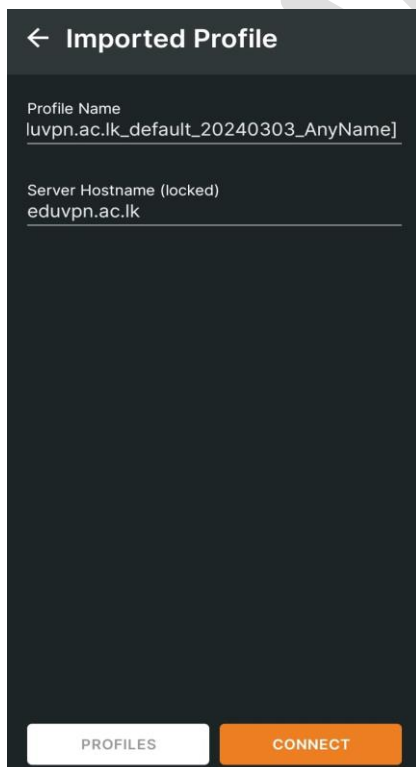

Then go to Settings in the menu of the app. Select its VPN Protocol as TCP.

## Step 07

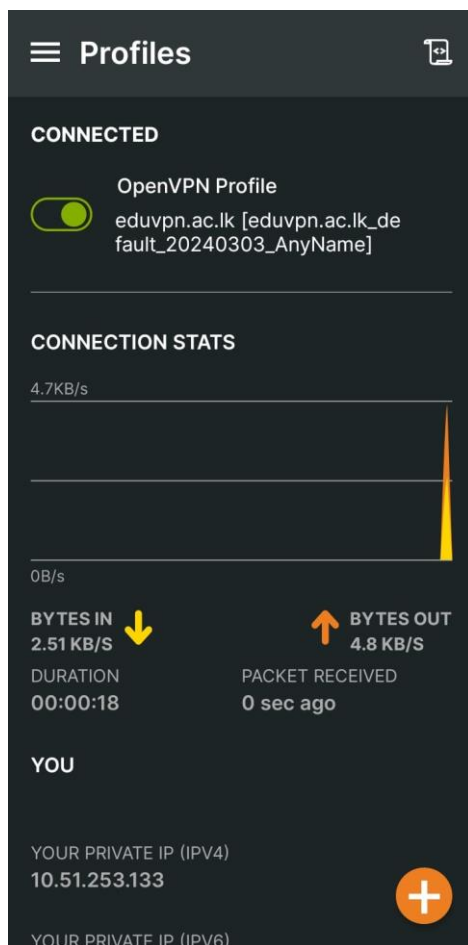

Then click Browser and open the downloaded file.

Then click connect.

Then if you see Connected like this, then the VPN has been installed successfully.

You can connect/disconnect this by using the VPN ON/OFF switch.

Now you can access this through any mobile network including router. no need to have data. Also, you can install the PC version here on your laptop and use it there as well.

### Considerable.

Only one account can be connected with one account at a time.

If there is no amount of data in the connection you are using, it may take some time to connect. (Maximum 2 minutes)

You must renew every 90 days.

If you have problems connecting, set the internet setting of your device as default. Remove Private DNS or other APN settings if they are used.
